Comment Text :

--->To Whom It May Concern:

1... ☐ I am a strong advocate for the protection of the environment and  
am against the depositing of radioactive waste in key impact areas  
such as Yucca Mountain, Nevada.

2 ☐ One of the key issues for the environment is the possibility  
that groundwater contamination could occur much sooner than is  
estimated. A closely related concern is that groundwater under  
Yucca Mountain is believed to migrate to and terminate under  
Death Valley. In addition to the possible impacts of such contamination  
to local flora and fauna, and on the Timbisha Shoshone tribe and farmers  
and communities in the Amargosa Valley, are the threats to the  
survival of the endangered Devil's Hole Pupfish, which  
1 cont. exists solely in the Devil's Hole unit of the park. ☐ The  
DEIS does not adequately address these possible problems.  
I do not believe that it has been substantially proven that  
radioactive waste can be stored safely without potentially  
severe harm to the environment. It must not happen at  
Yucca Mountain for these reasons!! ☐

Thank you for your consideration.
